

How to Connect Your OQTA Basic to Network

① Connect your OQTA Basic to a power outlet for the device to get ready to connect to network.

② Go to home and tap "OQTA Device."

③ Add Basic as MONO1. (The default name is "OQTA App.")

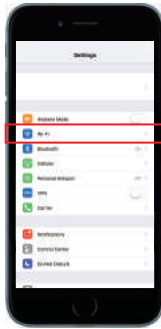

④ Push to NEXT button.

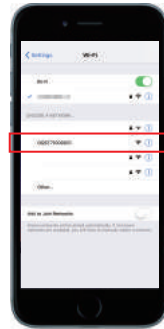

⑤ When this page is displayed Next is Wi-Fi setting.

⑥ Press the home button on your smartphone and go to the Wi-Fi setup page.

⑦ Tap "Wi-Fi" and choose a network that starts with "OQSTxxxxx."

⑧ Go back to the OQTA app after the network is properly chosen.

⑨ Connect to your home Wi-Fi. Enter the Wi-Fi password and tap "submit".

⑩ Add and connect your OQTA Basic to your home Wi-Fi.

⑪ The name of MONO1 will change to "OQSTxxxxx" if it has been successfully connected.

*Push to reset

※To reset the device to factory settings, push the reset button with a thin object such as a pepper clip.
